

Wesley van der Kraan

Full-Stack Developer (Front-end & Back-end)

Profile

Motivated and eager to learn full-stack developer with experience in both frontend and backend web development. Proficient in HTML, CSS, JavaScript and frameworks such as React and Vue 3, with knowledge of user-friendly and scalable UIs. Experience with backend technologies such as Node.js, Express.js, C#, and databases such as MySQL and PostgreSQL (PSQL). Worked on REST APIs, unit testing, and full web projects in team and independently. Strong in self-learning, and motivated to continuously grow within a professional development team.
